Background Information

SLC24A6, also named as NCLX, is a kind of mitochondrial sodium/calcium antiporter that mediates sodium-dependent calcium efflux from mitochondrion by mediating the exchange of 3 sodium ions per 1 calcium ion. It has been reported that SLC24A6 plays a key role in attenuating potential ROS production and injury upon cardiac reperfusion. SLC24A6 is associated with mitochondrial calcium homeostasis by mediating mitochondrial calcium extrusion. (PMID: 32728214, 20018762, 28219928)
