For Research Use Only

CD80 Monoclonal antibody, PBS Only

Catalog Number:66406-1-PBS

Purification Method:

Protein G purification

CloneNo.:

1E2F10

Basic Information

Catalog Number:

66406-1-PBS BC042665

Concentration: GenelD (NCBI): 1mg/ml 941

Source: UNIPROT ID:
Mouse P33681

Isotype: Full Name:
IgG1 CD80 molecule
Immunogen Catalog Number: Calculated MW:

AG5615 33 kDa

Observed MW:

68 kDa

GenBank Accession Number:

Tested Applications: WB, ELISA

Species Specificity:

human, mouse, pig

Background Information

CD80 (also known as B7-1) is a type I membrane protein that is a member of the immunoglobulin superfamily, with an extracellular immunoglobulin constant-like domain and a variable-like domain required for receptor binding. It is expressed on antigen-presenting cells (APCs), including B cells, dendritic cells, monocytes, and macrophages. CD80 is the receptor for the proteins CD28 and CTLA-4 found on the surface of T-cells. It is involved in the costimulatory signal essential for T-lymphocyte activation. T-cell proliferation and cytokine production is induced by the binding of CD28, binding to CTLA-4 has opposite effects and inhibits T-cell activation. CD80 also acts as a cellular attachment receptor for adenovirus subgroup B. (PMID: 7545666; 12015893; 16920215)

Storage

Applications

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80 $^{\circ}\text{C}$

Storage Buffer: PBS only, pH7.3

Selected Validation Data

Raji cells were subjected to SDS PAGE followed by western blot with 66406-1-lg (CD80 / B7-1 antibody at dilution of 1:2000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 66406-1-PBS in a different storage buffer formulation.
