For Research Use Only

CoraLite® Plus 555 Anti-Human CD163 (GHI/61)

Catalog Number: CL555-65169

Basic Information

Catalog Number: CL555-65169 Concentration:

100tests, 5 ul/test

Source: Mouse Isotype: IgG1, kappa

CD163 molecule Calculated MW:

GenBank Accession Number:

1156 aa, 125 kDa

BC051281

9332

GeneID (NCBI):

ENSEMBL Gene ID:

ENSG00000177575

UNIPROT ID:

Full Name:

Q86VB7

Purification Method:

Purified by protein-A affinity chromatography

CloneNo.:

Recommended Dilutions:

FC: 5 ul per 10^6 cells in 100 $\,\mu$ l

suspension

GHI/61

Excitation/Emission maxima

wavelengths: 554 nm / 570 nm

Applications

Tested Applications:

FC

Species Specificity:

Human

Positive Controls:

FC: human PBMCs,

Background Information

CD163, also known as M130, is a membrane glycoprotein which belongs to the scavenger receptor superfamily (PMID: 8370408). It is an acute phase-regulated and signal-inducing macrophage protein expressed exclusively in monocytes and tissue macrophages (PMID: 11196644). CD163 mediates endocytosis of haptoglobin-haemoglobin complexes (PMID: 11196644). The uptake of haptoglobin by macrophages contributes to the recycling of iron and also to the inflammatory response (PMID: 22900885). Soluble CD163 (sCD163), as a result of ectodomain shedding during inflammatory activation of macrophages, circulates in blood and has been suggested as a plasma/serum marker for macrophage activity (PMID: 12570164).

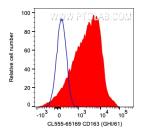

Storage

Storage

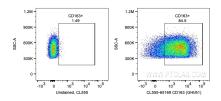

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment. Storage Buffer:

PBS with 0.09% sodium azide and 0.5% BSA, pH7.3

Selected Validation Data

1X10^6 human PBMCs were surface stained with 5 ul Coralite® Plus 555 Anti-Human CD163 (CL555-65169, Clone:GHI/61) (red) or unstained. Cells were not fixed. Monocytes and granulocytes were gated.

1X10^6 human PBMCs were surface stained with 5 ul Coralite® Plus 555 Anti-Human CD163 (CL555-65169, Clone:GHI/61) or unstained. Cells were not fixed. Monocytes and granulocytes were gated.
